

# The Winners

## Maritime Services Award

### Winner: OMC International

OMC's Dynamic Under Keel Clearance System has been a huge success for the group and given it international attention.

Introduced in 1993, the system has vastly improved efficiency and safety by maximising draught at 14 ports around Australia. The system has now also been adopted in Europe.

In a very competitive field, the judging panel saw OMC as standing out for being a leader in its field.

OMC International founder and executive director Dr Terry O'Brien with Ports Australia chief executive and awards judge David Anderson.

### Runner-Up

**Northern Stevedoring Services.** NSS general manager Todd Emmert (left) accepts the award from David Anderson.
